

A better cleaner | the best clean.

Featuring our exclusive

Automatic Steering System

The Hayward® Navigator®

Reengineered! The newly improved Hayward® Navigator® automatic in-ground cleaner now features:

-  Enhanced wingspan increases performance and coverage by 10%
-  Increased throat capacity enables larger debris to be collected
-  Contoured front bumper for faster turnaround
-  Improved, exclusive SmartDrive® automatic steering system

Better, faster clean than random cleaners

- Comprehensive cleaning, from microscopic dust and pollen to large debris
- Quiet, trouble-free operation – no need to empty or replace bags
- Easy installation – no tools required

An intelligent clean every time with SmartDrive® technology.

Exclusive, patented SmartDrive® automatic steering does what random cleaners can't – systematically clean your pool, quickly and efficiently. It has the proven ability to cover your entire pool surface for a comprehensive and complete clean. And now, SmartDrive is even better with a lengthened straight driving time so it goes further between rotations, making it easier to get up steep inclines or up walls.

SmartDrive®

Navigator® model 925C for concrete pools.

Navigator model 925V for vinyl-liner pools.

Better features for a better clean.

With an increased throat capacity of over 40%, the Navigator vacuums large debris while it covers your entire pool. From microscopic dust and pollen to large leaves and twigs, the Navigator handles it all. The front bumper has been curved to allow faster push-off from walls so it can spend more time cleaning. And with the enhanced wingspan, coverage and performance are increased by 10%.

Your pool, made better with the Navigator.

The Navigator from Hayward gives you easy, trouble-free operation by running off of your existing filtration system, so you don't have the expense of a separate pump. And you won't waste time emptying or replacing debris bags. The Navigator comes with a two-year limited warranty and gives you a sparkling clean pool every time. And when you install your new Navigator as part of the Totally Hayward™ System, you get the assurance of knowing you have a complete system, designed to work together for the best operation and the cleanest, clearest water possible.

100% larger intake plate. Increased wingspan.

Accessories:

The optional Leaf Canister interconnects in-line, trapping leaves and debris before reaching your pool's filter system. Its see-through design lets you know when to empty.

The optional Skimmer Vacuum Plate automatically alternates between vacuuming the pool and skimming the pool's surface with each cycle of the filtration system's time clock.
