

# Always a Clean Pool

AUTOMATIC IN-FLOOR CLEANING & CIRCULATION

Designing a custom pool means creating the magical tranquility of your own backyard oasis...anything from the romance of water sparkling under a full moon, to family fun just outside your backdoor.

Investing in a pool also means improving your home and health, a beautiful way to welcome guests, ease stress and inspire inner peace. A pool makes any home more inviting and provides the security and privacy of your own resort.

To make that journey carefree, Paramount Pool & Spa Systems developed the PCC 2000 Cleaning & Circulation System. Installed exclusively by authorized factory-trained pool builders, PCC 2000 keeps your pool healthy and clean with a patented virtually invisible automatic dirt and debris removal system designed specifically for each unique setting.

Protect your pool investment with Paramount's PCC 2000, designed to enhance any backyard oasis and help you enjoy the lifestyle you deserve.

8 Designer Colors to Complement Your Pool Surface!

Installed Only By Authorized Factory Trained Pool Builders.

**CLEANS YOUR POOL SO YOU DON'T HAVE TO!**

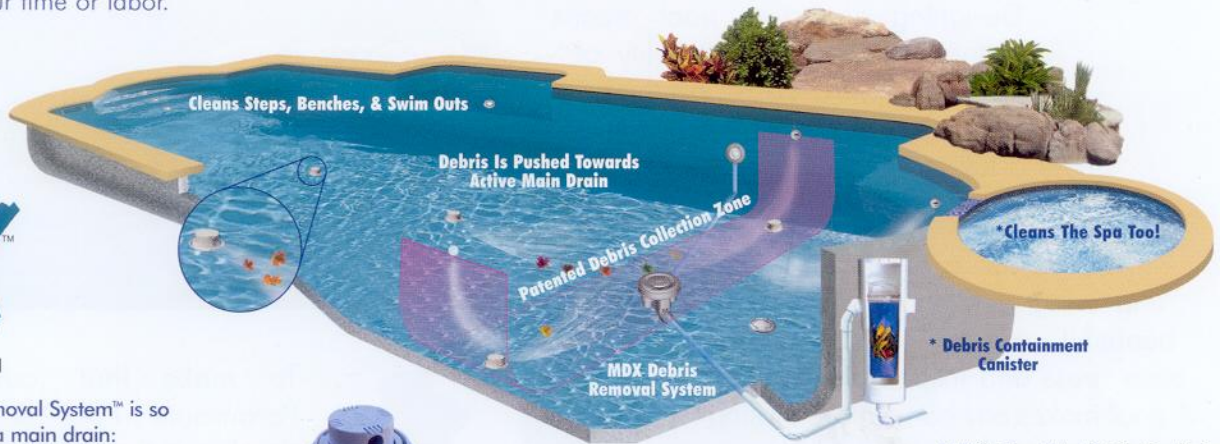

# How It Works!

PCC 2000 is a cleaning and circulation system custom engineered specifically for the pool you create. It will clean any pool you design with pop-up spray nozzles built into your pool during construction. PCC 2000 will clean steps, benches, fountains, walls, even your spa\*, any way you design it.

More than a simple cleaning system, PCC 2000 is a better way to build your swimming pool. The pop-up nozzles push debris from every corner of your pool toward the Patented Collection Zone, an area stretching across the deepest part of your pool where debris is then channeled to the active main drain. From there, pool waste travels to the optional debris containment canister designed for convenient deck-side access.

PCC 2000's cleaning system is not only effective for any pool interior surface, but saves money in heating and chemicals over the lifetime of the pool. Paramount's PCC 2000 enhances your pool invisibly and keeps your backyard pool automatically clean without your time or labor.

\* The MDX Debris Removal System™ is so much more than just a main drain:

- Designed to exceed anti-entrapment requirements world-wide (both hair and body).
- Large debris passes through MDX™ for easy removal through the optional debris containment canister.

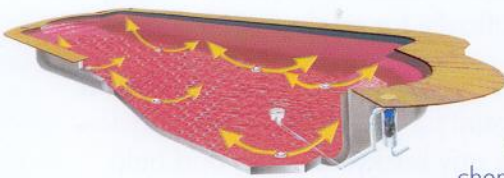

Small nearly invisible nozzles are strategically placed in your pool's floor conforming to the shape of you pool.

\* MDX Debris Removal System™, Debris Containment Canister, and nozzles in steps, benches, swim-outs & spa are optional. Actual system layout may vary according to each pool design.

**GUARANTEED TO OUT-CLEAN ANY POOL CLEANER MANUFACTURED IN THE WORLD TODAY!**

## PCC 2000 Saves You Money On Heating & Chemical Costs

Tests have shown that conventional pools consume up to 50% more chemicals and 30% more heat than pools with in-floor systems. Your pool's environment will have a large impact on maintenance costs, and PCC 2000 will dramatically make a difference. Both heat and chemicals escape the water more rapidly at the surface of the pool, but properly circulated water results in lower heat and chemical losses and lower costs for you over the lifetime of the pool.

## WHAT PCC 2000 DOES FOR YOU

In-Floor Automatic Pool Cleaning & Circulation  
 Saves You Money on Heating & Chemical Costs  
 Increases Your Pool Play-time  
 Extended Swimming Season

Cleans Your Pool...So You Don't Have To!  
 Limited Lifetime Warranty  
 Your Pool is Always Swim-Ready
